

Note: You will find other equivalent electronic components in the kit. This is the list:

- Breadboard
- IO extender
- RGB Led Module
- Photoresistor
- Sound detection sensor

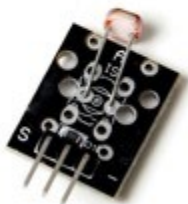

IO extender

1 x Breadboard

RGB Led Module

Photoresistor

1 x Sound Detection Sensor

Since the IO extender has only two pins and the other components have three or four pins, they must be connected through the Breadboard.

Here's how to wire the project:
